

# Annual & Consolidated Report - Urban and Rural Based Charitable Activities

## Jan 2025-Dec 25

**"ITS BETTER TO LIGHT ONE CANDLE  
THAN CURSE THE DARKNESS"**

**CONFUCIUS**

**JAYARANGAM WARD**

## PRELUDE

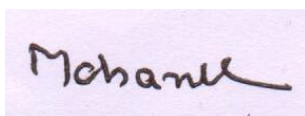

JIVAS's urban and rural charitable activities have continued seamlessly into 2025. Here we are highlighting the activities 2025 and has progressed with more zeal. Here we are depicting only the 2025 activities, omitting many functional details found in previous years reports. Thus omitting repetitions and makes it an easier read of the details and numbers

THESE HAVE BEEN POSSIBLE THROUGH UNFLINCHING SUPPORT OF OUR MANY WELL WISHERS AND DONORS. WE, ON BEHALF OF OUR PATIENTS WHO HAVE BENEFITTED IMMENSELY FROM YOUR SUPPORT, OFFER HEARTFELT APPRECIATION AND THANK YOU ON THEIR BEHALF

DR. K. R. SURESH  
for TEAM JIVAS

**We, the Management of Bhagwan Mahaveer Jain Hospital and Staff of JIVAS, are immensely thankful for following for providing unflinching support to these projects which help our low income patients.**

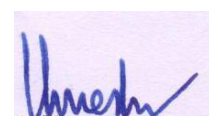

1. The Surana Family- Late Mr. Gewarchandji and his sons Mr. Dilip and Mr. Anand
2. Late Dr. Mohammad Majeed and now his daughter Anju Majeed, of Sami Labs- Nearly all our present rural activity are funded from this through ATHREYA VASCULAR FOUNDATION (AVF)
3. Mr. Manu Chatlani of "Have a Heart Foundation".
4. Mr. Sudarhsan & Mrs. Fiona Karle and their daughter Eshanya of Karle Homes Pvt.Ltd

**Mr. Mohanlal  
Ranka President -  
BMJH**

**Mr. Paras Jain  
Secretary -  
BMJH**

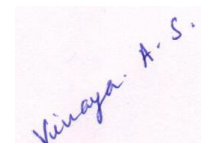

**Dr. Umesh  
MD- BMJH**

**Dr. K. R. Suresh  
Director - JIVAS**

**Dr. Vivekananda  
HoD - JIVAS**

**Dr. Vinaya A  
S HoD - Hejje**

## THE SUMMARY

1. The rural charitable “**ProjectANVESHINI**” continues as outlined in last years report.

|                                               | Jan 25-Dec 25 | Total (2007-Dec 25) |
|-----------------------------------------------|---------------|---------------------|
| <b>Number of villages covered</b>             | <b>3218</b>   | <b>6384</b>         |
| <b>Number of population screened</b>          | <b>18622</b>  | <b>3089624</b>      |
| <b>Number of new diabetics detected</b>       | <b>1718</b>   | <b>58794</b>        |
| <b>Total known diabetics</b>                  | <b>32117</b>  | <b>167881</b>       |
| <b>Mass foot screening in villages by HCW</b> | <b>286473</b> | <b>9534594</b>      |

The well-equipped and staffed mobile van visits rural areas to provide screening and care for diabetic patients, mostly for foot and vascular problems. The visits cover numerous impoverished rural areas within 250 kms. of Bengaluru. On an average the mobile unit conducts these “clinics” 24 time a month, apart from screening camps totaling 476 visits. 71778 patients were screened/evaluated in Jan 25-Dec 25.

|                                       | Jan 25-Dec 25 | Total (2007-Dec 25) |
|---------------------------------------|---------------|---------------------|
| <b>Number of mobile clinic visits</b> | <b>476</b>    | <b>3361</b>         |
| <b>Number of patients seen</b>        | <b>71778</b>  | <b>262341</b>       |
| <b>Number of diabetics</b>            | <b>8640</b>   | <b>77082</b>        |
| <b>Newly diagnosed diabetics</b>      | <b>3713</b>   | <b>17214</b>        |

**9. Financial literacy counselor (FLC), Tiptur**

| <b>FLC</b>           | <b>Camps</b> | <b>Patients seen</b> |
|----------------------|--------------|----------------------|
| <b>Jan 25-Dec 25</b> | <b>28</b>    | <b>4703</b>          |

**SO FAR THE NUMBER OF PATIENTS SEEN (NEW AND REVISITY) SINCE INCEPTION OF THESE PROJECTS IS OVER 1.239 CRORE**

## **Diabetic foot care in rural areas**

**Report for Jan 2025 to December 2025**

Target areas

Bangalore Rural, Tumkur & Chikkaballapur districts

Implementing agency

**Gramina Abyuday Seva Samthe (GASS)**

Doddaballapur

Supported by

**Jain Institute of Vascular Sciences, (JIVAS)**

a unit of Bhagwan Mahaveer Jain Hospital (BMJH), Bengaluru.

## Background

Jain Institute of Vascular Sciences, (JIVAS) a unit of Bhagwan Mahaveer Jain Hospital (BMJH) Bengaluru has partnered with Gramina Abyuday Seva Samsthe (GASS) to reach out to those vulnerable and marginalized people living in remote villages of Karnataka who have diabetes through JIVAS diabetics care program. Over the years, we have reached out to more than 2 lakhs people in preventing and treating diabetes and its foot complications. The interventions include;

- Awareness camps using leaflets, audio visual materials and home visits.
- Survey to identify people affected with diabetes
- Screening for diabetes and treatment facilitated by Jain hospital team and
- Training of health workers for diabetic screening and follow-up.

GASS covers basically 3 districts namely,

1. Tumkur District (Koratagere Taluk)
2. Chikkaballapur District (Gowribidanur Taluk) and
3. Bangalore Rural District (Doddaballapur Taluk & Devanahalli Taluk)

## The intervention

During 2025, GASS has been continuing the activities in the four Anveshani Project Areas in three districts with the technical support from Jain hospital team. These interventions are special because those who attend these camps are brought from interior villages where they have not been any medical reach, including the screening for diabetes or the foot complications related to it. GASS gives special focus on the senior citizens who are usually neglected in the community.

The local health workers play a vital role in the process by informing the people about the camps and services and sending them to attend the camps. They also get orientation on the illness and the basic symptoms to identify people likely to need treatment. The health workers and the Anganwadi teachers are given training once in two months so that they are updated and interested in referring people to the services. Once trained, they also take active part in the initial screening of the patients at the village level before sending them to the camps for expert diagnosis, treatment and care.

GASS makes arrangements for the camps in Primary Health Centers, schools or on its premises in the three locations. The staff make all arrangements for the camp in advance and make sure the maximum people attend these camps every time. They are followed up by the staff on a regular basis to monitor improvements.

As part of awareness building School health programs are also conducted. It is also an occasion to screen children suspected of having diabetes and start the treatment if required at the early stages.

## Key achievements

With regular camps every month in most of the locations, GASS has been able to reach out to thousands of people in a number of remote villages. Here are some data;

- ✓ Total villages covered for screening – 670 villages.
- ✓ Total population covered for screening – .9 lakhs
- ✓ Total number of GASS camps organized – 171 camps
- ✓ Total patients screened – 17428 patients
- ✓ Newly Diagnosed Diabetic people – 1718
- ✚ Training program for volunteers – 831 people trained.
- ✚ GASS Health Care Worker – 122 people
- ✚ NGOs trained – 19 (323 people trained)
- ✚ School health program – 18 (314 people trained)
- ✚ PHC (primary health centers) covered – 23.
- ✚ 6 different camps were organized in 6 different villages of Doddaballapura and Alipura area for the persons with physical disabilities and speech and hearing disabilities.
